PT. B.D. SHARMA UNIVERSITY OF HEALTH SCIENCES, ROHTAK

No. UHSR/Acad./A-I/2022/ 5955

Dated: 28/06/2022

NOTIFICATION

Subject:

Conduct of Common Entrance Examination for admission to B.Sc. Nursing, Post Basic B.Sc. Nursing, M.Sc. Nursing, NPCC, BPT, MPT & other Paramedical Courses for the Academic Session 2022-23

Pt. B.D. Sharma University of Health Sciences, Rohtak has been entrusted for admission to the above courses vide DMER, Haryana Memo No. C&AB/F24/22-23/DMER/14541 dated 25.05.2022. The Common Entrance Examination shall be conducted by the Pt. B.D. Sharma University of Health Sciences, Rohtak in the 3rd/4th week of July for admission to various UG Courses i.e. B.Sc. Nursing, Post Basic B.Sc. Nursing, BPT and other Paramedical courses (B.Sc. MLT, B.Sc. OT, Bachelor of Optometry, B.Sc. Radiotherapy Technology, B.Sc. Radiography & Imaging Technology & B.Sc. Perfusion Technology) and PG courses i.e. M.Sc. Nursing, NPCC, MPT for the session 2022-23. Syllabus and the scheme of the examination for each course has been uploaded on the University Website. The schedule for inviting online application forms for admission to the above mentioned courses and the exact date of Common Entrance Examination shall be uploaded on the University Website i.e. www.uhsr.ac.in

Name of colleges with number of seats and its distribution (as per State Govt. Reservation Policy), fee structure etc. shall be uploaded on the University Website shortly.

In this regard all the desirous candidates are advised to visit the University Website regularly for further update.

DEAN ACADEMIC AFFAIRS

SCHEME OF EXAMINATION FOR ADMISSION TO MPT COURSE (2 YEARS COURSE)

1. Date & Time of Entrance Examination:

To be notified on University Website i.e. www.uhsr.ac.in

- 2. Medium of Examination The medium of Entrance Examination will be English.
- 3. Scheme of Examinations: The Entrance examination shall consist of one paper. The paper will include Objective type questions.

4. Number of questions and Maximum Marks: 2 Years course- Three hours duration – 180 MCQ questions (180 marks)

The Entrance Test questions will be based on the syllabus of Bachelor of Physiotherapy of Pt. B. D. Sharma University of Health Sciences. The subjects and marks distribution will be as following:

1.	Anatomy	:10
2.	Physiology	:10
3.	Electrotherapy	:20
4.	Exercise Therapy	:20
5.	Biomechanics	:20
6.	Orthopedics	:15
7.	PT in Orthopedics	:20
8.	PT in Medical & Surgical Conditions	:20
9.	Rehabilitation	:20
10	. Ethics	:10
11.	Research Methodology & Biostatistics	:15

There will be no negative marking.

5. Instructions for Question Booklet

A Question Booklet and Answer Sheet will be given to candidate immediately after taking seat. They are advised to read and follow the instructions on front and back- page of the question Booklet carefully.

Each Question Booklet is assigned a number and code (A or B or C or D) mentioned on the front page, which every candidate must carefully fill in the appropriate place on the Answer Sheet. Candidate must sign on the front page of the Question Booklet at the appropriate place.

Candidate must check that Question Booklet has I80 questions immediately after breaking the seal.

The Question Booklet has paper seal pasted on it. Candidate should break the seal and open the Question Booklet only when they are asked to do so by the invigilator.

6. Instructions for Answer Sheet

provided this Answer sheet is in Prospectus. dummy sample of the (blue/black) strictly as directed on the Answer Sheet. quality ball pen Use good Do not fold or put any stray mark, nor do any rough work on the Answer Sheet. Fill in the Roll No, Question Booklet No. and Booklet Code printed on front page of the Question Booklet in the proper blocks as directed on the Answer Sheet.

Sign at the appropriate place on the Answer Sheet with Ball pen (blue/black).

7. Rough Work

The candidate should not do any rough work on the Answer-sheet. All rough work can be done on the last page of Question Booklet. Do not mark or write anything elsewhere in the Question Booklet/ Answer Sheet.

8. Procedure to be followed in the Examination Hall

The candidates are advised to ensure their eligibility as per provisions made in the Prospectus before appearing in the Entrance Examinations. They will be admitted to the Entrance Examination provisionally. Mere appearing in the Entrance Examination will not make them eligible for counselling. However, the eligibility for the counselling will be determined by the counselling board after the verification of relevant/ necessary documents.

The Answer-sheet used by the candidate is to be evaluated by Computer and is to be used carefully. Complete and accurate marking on this sheet is, therefore, extremely important.

No candidate shall be allowed to enter in the Examination Hall after start of the examination.

Books papers, slide rule, log table, cellular phone, pager, calculator etc. are not allowed in the Examination Hall.

During the examination the Invigilator will check the Admit-Card of the candidate and compare photographs to satisfy herself/himself about the identity of each candidate. The invigilator will also put her/his signature in the place provided in the Answer- Sheet.

To answer the questions, the candidate will be required to darken the circle by using blue ball pen corresponding to the serial number of the question in the answer sheet.

It should be carefully noted that the circles should be darkened and be filled in as completely as possible

A signal will be given at the beginning of the examination and at half time.

A signal will also be given before the closing time when the candidate must stop marking responses. After completing the test and before handing over the Question Booklet and Answer- Sheet, the candidate should check again that all the particulars required in the Question booklet and Answer Sheet have been correctly written.

The Question booklet and the Answer sheet are to be handed over to the Supervisor/Invigilator before leaving the hall the candidate who does not hand over the Question booklet along with the Answer Sheet to the Supervisor/Invigilator, her candidature will stand cancelled besides facing action to be decided by the Authority.

The candidates are required to furnish the' Admit Card' at the time of (i) entry Into the Examination Hall and (ii) during the course of examination for necessary identification by the supervisory staff on duty. The candidates are, therefore, advised to keep the 'Admit Card' intact.

There is no provision of revaluation/re-checking of Answer sheets.

The University will be free to take the thumb impression of the candidates at the time of Entrance Test, Counselling and even after admission to the class.

Video-graphy/photography will be done of each student. The student will wear a slip on left shoulder bearing her roll number.

The video-graphy/photography and finger prints expert report etc. In doubtful cases will be the basis for determining/ascertaining of the identity of the candidate.

* Sample questions along with method of marking are given below:

Question: When we are dealing with an individual by using Social Work techniques for the management of his problems. This method is:

(1) Social Action (2) Social Group Work

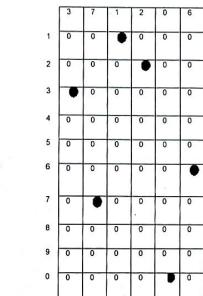

(3) Social Case Work (4) Socialization

(A)

(B

(D)

*The candidate will be required to write Roll No. and other particulars on the OMR ANSWER SHEET as shown below in the example for Roll No.371206

Roll No. 371206

9. PUNISHMENT FOR USE OF UNFAIR MEANS

If any candidate is found guilty of any breach of rules mentioned in the prospectus or guilty of using unfair means, she/he will be liable to be punished by the Competent Authority.

Unfair means include:

- i) Impersonation
- ii) Copying with help of the books/cell phone/verbal communication/piece of paper having material for copying.
- iii) Exchange of Question Booklet/Answer Sheet.
- iv) Copying by seeing the other candidate answer books.
- v) Any other method of unfair means not mentioned in the prospectus.
- vi) The action will be taken as per the unfair means ordinance or as per the recommendations of the Vice-Chancellor.

11. LEGAL JURISDICTION

All disputes pertaining to the conduct of examination and admission shall fall within the jurisdiction of Rohtak only. The competent authority shall be the legal entity who may sue and be sued.

^{*} being the correct answer has been darkened.

SCHEME OF EXAMINATION FOR ADMISSION TO POST BASIC BSC NURSING., MSC (N) AND NPCC COURSES

1. (A) Date of Entrance Examination

: To be notified on University Website i.e uhsr.ac. in

The medium of Entrance Examination will be English.

- 2. Scheme of Examinations:
 - The Entrance examination shall consist of one paper. The paper will include Objective type questions.
- 3. Number of questions and Maximum Marks
 - Post Basic B.Sc Nursing- 2 years course-Three hours duration -180 MCQ Questions (180 Marks). Subject- Anatomy Physiology, Microbiology, psychology, sociology, fundamentals of nursing, First Aid, Community health Nursing, Mid wifery and gynecology, Pediatric, Nursing Mental Health& Psychiatric Nursing, Medical Surgical Nursing
 - M.Sc. Nursing-2 Years course- Three hours duration 180 MCQ questions (180 marks) subjects (Medical Surgical Nursing, Community Health Nursing, Pediatrics Nursing, Psychiatric Nursing & Obst & Gynea., Nursing Research & Statistics, Nursing Education & Administration & General knowledge & current affairs.
 - NPCC Course- Entrance Exam on the basis of B.Sc. (N) Three hours duration Syllabus (180 Marks) MCQ. Subject- Anatomy & Physiology, Nutrition & Biochemistry, Nursing Fundamental, Psychology, Microbiology, English Computer, Sociology, Medical Surgical Nursing, Pathology, Community Health Nursing, Psychiatric Nursing, Research & Statistics, Obs. & Gyane., Management & Nursing Service & Education etc.

There will be no negative marking.

- 4. Instructions for Question Booklet
- (i) A Question Booklet and Answer Sheet will be given to candidate immediately after taking seat. They are advised to read and follow the instructions on front and back- page of the question Booklet carefully.
- (ii) Each Question Booklet is assigned a number and code (A or B or C or D) mentioned on the front page, which every candidate must carefully fill in the appropriate place on the Answer Sheet.
- (iii) Candidate must sign on the front page of the Question Booklet at the appropriate place.
- (iv) Candidate must check that Question Booklet has 180 questions immediately after breaking the seal.
- (v) The Question Booklet has paper seal pasted on it. Candidate should break the seal and open the Question Booklet only when they are asked to do so by the invigilator.
 - 5. Instructions for Answer Sheet
- (i) A dummy sample of the Answer sheet is provided in this Prospectus.
- (ii) Use good quality ball pen(blue/black)strictly as directed on the Answer Sheet.
- (iii) Do not fold or put any stray mark, nor do any rough work on the Answer Sheet.
- (iv) Fill in the Roll No, Question Booklet No. and Booklet Code printed on front page of the

Question Booklet in the proper blocks as directed on the Answer Sheet.

(v) Sign at the appropriate place on the Answer Sheet with Ball pen (blue/black).

6. Rough Work

The candidate should not do any rough work on the Answer-sheet. All rough work can be done on the last page of Question Booklet. Do not mark or write anything elsewhere in the Question Booklet/ Answer Sheet.

7. Procedure to be followed in the Examination Hall

- a) The candidates are advised to ensure their eligibility as per provisions made in the Prospectus before appearing in the Entrance Examinations. They will be admitted in the Entrance Examination provisionally. Mere appearing in the Entrance Examination will not make them eligible for counseling. However, the eligibility for the counseling will be determined by the counseling board after the verification of relevant/ necessary document.
- b) The Answer-sheet used by the candidate to be evaluated by Computer and is to be used carefully.
 Complete and accurate marking on this sheet is, therefore, extremely important.
- c) No candidate shall be allowed to enter in the Examination Hall after starting of the examination.
- d) Books papers, slide rule, log table, cellular phone, pager, calculator etc. are not allowed in the Examination Hall.
- e) During the examination the Invigilator will check 'the Admit-Card' of the candidate and compare photographs to satisfy herself/himself about the identity of each candidate. The invigilator will also put her/his signature in the place provided in the Answer-Sheet
- f) To answer the questions, the candidate will be required to darken the circle by using blue ball pen corresponding to the answer sheet inks to be corrected against the serial number of the question.
- g) It should be carefully noted that the circles should be darkened and be filled in as completely as possible
- h) A signal will be given at the beginning of the examination and at half time. A signal will also begiven before the closing time when the candidate must stop marking responses.
- After completing the test and before handing over the Question Booklet and Answer-Sheet, the candidate should check again that all the particulars required in the Question booklet and Answer Sheet have been correctly written.
- j) The Question booklet and the Answer sheet are to be handed over to the Supervisor/Invigilator before leaving the hall the candidate who does not hand over the Question booklet along with the Answer Sheet to the Supervisor/Invigilator, her candidature will stand cancelled besides facing action to be decided by the Authority.
- K) The candidates are required to furnish the' Admit Card' at the time of (i) entry Into the Examination Hall and (ii) during the course of examination for necessary identification by the supervisory staff on duty. The candidates are, therefore, advised to keep the 'Admit Card' intact.
- I) There is no provision of revaluation/re-checking of Answer sheets,

- m) The University will be free to take the thumb impression of the candidates at the time of Entrance Test, Counseling and even after admission to the class
- n) Videography/photography will be done of each student. The student will wear a slip on left shoulder bearing her rollnumber.
- O) The videography/photography and finger prints expert report etc. In doubtful cases will be the basis for determining/ascertaining of the identity of the candidate.

8. PUNISHMENT FOR USE OF UNFAIR MEANS

If any candidate is found guilty of any breach of rules mentioned in the prospectus or guilty of using unfair means, she/he will be liable to be punished by the Competent Authority.

Unfair means include:

- i) Impersonation
- ii) Copying with help of the books/cell phone/verbal communication/piece of paper having material for copying.
- iii) Exchange of Question Booklet/Answer Sheet.
- iv) Copying by seeing the other candidate answer books.
- v) Any other method of unfair means not mentioned in the prospectus.
- vi) The action will be taken as per the unfair means ordinance or as per the recommendations of the Vice-Chancellor.

9. MEDICAL EXAMINATION

- a. The selected candidates at the time of counseling(s) will report to respective colleges for medical examination and fee deposition on the dates fixed by the Counseling Board. The standard of physical fitness required for admission will be determined by the said Board. The candidature of CANDIDATES found medically unfit will be liable to cancellation.
- b. Selected physically handicapped candidates will also have to appear before the Medical Board for assessment whether they are fit to carry out the duties despite being handicapped. The decision of the Board will be final.

10. LEGAL JURISDICTION

All disputes pertaining to the conduct of examination and admission shall fall within the jurisdiction of Rohtak only. The competent authority shall be the legal entity who may sue and be sued.

Sample questions along with method of marking are given below

Question: When a tuning fork vibrates with 1.0 m or 1.05 m long wire of a conomotor, 5 beats per second are produced in Each Case. What will be the frequency of the tuning fork?

(A). 195

(B).295

(C).205

(D).210

SYLLABUS FOR Post Basic B.Sc. NURSING (2 years)

Complete syllabus of General Nursing & Midwifery including Internship i.e.

Subject- Anatomy Physiology, Microbiology, Psychology, Sociology. Fundamentals of Nursing, First Aid, Community Health Nursing, Midwifery and Gynecology, Pediatric Nursing, Mental Health & Psychiatric Nursing, Medical Surgical Nursing.

SYLLABUS FOR M.Sc. NURSING (2years)

Therewillbeatotalof180objectivetypequestionsfromalltheNursingsubjectsdetailed below:

- a. Medical Surgical Nursing.
- b. Community Health Nursing.
- c. Paediatrics Nursing.
- d. Psychiatric Nursing.
- e. Obst. &Gynae.
- f. Nursing Research & Statistics
- g. Nursing Education & Administration.
- h. General Knowledge & current affairs.

SYLLABUS FOR NPCC COURSE (2 years)

- a. Anatomy & Physiology
- b. Nutrition & Biochemistry
- c. Nursing Fundamental
- d. Psychology
- e. Microbiology
- f. English
- g. Computer
- h. Sociology
- i. Medical Surgical Nursing
- j. Pathology
- k. Community Health Nursing
- I. Psychiatric Nursing
- m. Research & Statistics
- n. Obs. & Gyane
- o. Management
- p. Nursing Service & Education

ONLINE ADMISSION PROCEDURE

This section provides an overview of the steps involved in admission process.

A. Online Registration

- Candidate should visit website <u>www.uhsr.ac.in</u> Candidates should go through prospectus
 for gathering information/ instruction in details about counseling schedules and procedures.
 Softcopy is available on the websites <u>www.uhsr.ac.in</u>
- Candidates will register themselves as per key dates mentioned in the admission schedule
- For participation in online admission process, a candidate has to register by submitting
 personal data/ requisite information correctly in the online application form. On submitting
 this data/ information user Id and password will be generated/ created for use in future
 logins by the candidate.
- For subsequent logins, candidates will be able to login directly with their user 1d and
 password candidates should remember to logout at the end of their session so that the
 details filled in them cannot be tampered with or modified by unauthorized person.
- Candidates are advised to record/remember their password for future logins and not to disclose or share their password with anybody.
- It is the responsibility of the candidates to verify that the data /information submitted by
 them at the time of registration is correct and allotment of seat is liable to be cancelled if
 the same is found to be wrong at the time of verification of original certificates
- If the personal data submitted/ entered by the candidates are found to be wrong at the time verification of certificate either during reporting or at a later stage, the allotment of seat/provisional admission is liable to be cancelled.
- Candidates should take a print out (hard copy) of the online application form containing the above personal data for future use.

R. Payment of Registration - cum - Counseling Fee for Entrance Test and Admission.

- Last date for payment of Registration-cum-counseling fee is as per key dates mentioned in the admission schedule.
- Please ensure that registration-cum-counseling fee during online registration is paid within stipulated time failing which the candidate would not have any claim for eligibility in counseling.

C. ADMISSION PROCESS:

 Admission Process shall be carried out on the basis of relative merit in Common Entrance Test conducted for session 2021-22.

D. Reporting at Allotted College/Institute

- Candidates will produce all the relevant certificates in original including registration and counseling fee receipt for verification, a signed print out of their online application form generated from the website at the time of reporting.
- The allotment of seats to candidates who do not report within the stipulated period to the allotted college will be cancelled

SCHEME OF EXAMINATION FOR ADMISSION TO BSC (N), BPT AND OTHER PARA MEDICAL COURSES

1. Date of Entrance Examination : To be n

: To be notified on University website i.e www. uhsr.ac.in

2. Medium of Examination

The medium of Entrance Examination will be English.

3. Scheme of Examination

The Entrance examination shall consist of one paper of three hours duration-The paper will include objective type questions.

- 4. Number of questions and Maximum Marks
- (i) There will be total of 180 objective type questions (in the subject of Physics, Chemistry and Biology (Botany & Zoology).
- (ii) The paper shall carry a maximum of 180 Marks.
- (iii) There will be No Negative Marking.
- 5. Instructions for Question Booklet
- (i) Candidates will be given a Question Booklet and Answer Sheet immediately after taking seat They are advised to read and follow the instructions on front and back-page of the question Booklet carefully.
- (ii) There is Question Booklet number and code (A or B or C or D) mentioned on the front page. which every candidate must carefully fill in the appropriate place on the Answer Sheet.
- (iii) Candidate must sign on the front page of the Question Booklet at the appropriate place.
- (IV) The Question Book let has paper seal pasted on it. Candidate should break the seal and open the Question Booklet only when they are asked to do so by the Invigilator.
- (v) Candidate must check that Question Booklet has 180 questions immediately after breaking the seal. In case any mistake In the Question Booklet is found, Invigilator may be requested to change the same immediately.
- (vi) The Question Booklet and the Answer Sheet must be returned to the Invigilator before leaving the Hall.
- (vii) The candidate shall indicate the number of questions attempted in each section.
- 6. Instructions for Answer Sheet
- (i) A dummy sample of the Answer sheet is available in this Prospectus.
- (ii) Use good quality ball pen (blue/black) strictly as directed on the Answer Sheet.
- (iii) Do not fold or put any stray mark, nor do any rough work on the Answer Sheet.
- (iv) Fill in the Roll No. and Question Booklet No. and Booklet Code printed on front page of the Question Booklet in the proper blocks as directed on the Answer Sheet.
- (v) Sign at the appropriate place on the Answer Sheet with Ball pen(blue/black).
- 7. Rough Work

The candidate should not do any rough work on the Answer-sheet. All rough work can be done on the last page of Question Booklet. Do not mark or write anything elsewhere in the Question Booklet and OMR Answer Sheet.

8. Procedure to be followed in the Examination

- (i) No candidate shall be allowed to enter in Examination Hall after starting of examination.
- (ii) 10 minutes before the commencement of the examination each candidate will be given a sealed. Test Booklet and OMR answer-sheet.
- (iii) Immediately on receipt of the Test Book let the candidate will fill in the required particulars on cover page of the Test Booklet with Blue or Black ball pen only. But she/he will not open the Test Booklet until asked to do so by the invigilator.
- (iv) Books, papers, slide rule, log table, paper, cellular phone, pager, calculator, wrist watches or any other electronic gadget etc. are not allowed in the Examination Hall.
- (v) Complete videography/photography will be done of all the candidates.
- (vi) The examination will start exactly at the time mentioned in the Admit card and an announcement to this effect will be made by the Invigilator.
- (vii) During the examination the Invigilator will check 'Admit-Card' of the candidate and compare photographs to satisfy himself about the identity of each candidate. The invigilator will also put his signature in the place provided in the Answer-Sheet,
- (viii) The candidate shall bring his own black/blue Ball Pens.
- (ix) After completing the test and before handing over the Test Booklet and Answer-Sheet, the candidate should check again that all the particulars required in the Test booklet and the Answer Sheet have been correctly written.
- (x) A signal will be given at the beginning of the examination and at half time. A signal will also be given before the closing time when the can did at esmust stop marking responses.
- (xi) The candidate will be supplied OMR Answer Sheet which will be evaluated by Computer and is to be used carefully. Complete and accurate marking on this sheet is, extremely important.
- (xii) (a) To answer questions, the candidate will be required to darken in the circle by using blue/black ball Pen corresponding to the answer, she/he thinks to be correct against the serial number of the question.
 - (b) It should be carefully noted that the circles should be darken properly and be filled in as complete as possible.
- (xiii) The test-booklet and the OMR Answer sheet are to be handed over to the Supervisor/Invigilator before leaving the hall. The candidate who does not hand over the test-booklet along with the OMR Sheet to the Supervisor/Invigilator, her/his candidature will stand cancelled besides facing action to be decided by the Authority.
- (xiv) "The candidates are required to furnish the 'Admit Card' at the time of (i) entry In to the Examination Hall and (ii) during the course of examination for necessary identification by the supervisory staff on duty. The candidates are, therefore, advised to keep the 'Admit Card' intact.
- (xv) There will be no revaluation/re-checking of OMR Answer sheets.

9. PUNISHMENT FOR USE OF UNFAIR MEANS

If any candidate is found guilty of any breach of rules mentioned in the prospectus or guilty of using unfair means, she/he will be liable to be punished by the Competent Authority.

10. MEDICAL EXAMINATION

- (a) The selected candidates at the time of counseling(s) will report to respective colleges for medical examination and fee deposition on the dates fixed by the Counseling Board. The standard of physical fitness required for admission will be determined by the said board. The candidature of CANDIDATES found medically unfit will be liable to cancellation.
- (b) Selected physically handicapped candidates will also have to appear before the Medical Board for assessment whether they are fit to carry out the duties despite being handicapped. The decision of the Board will be final.

11. LEGAL JURISDICTION

All disputes pertaining to the conduct of examination and admission shall fall within the jurisdiction of Rohtak only. The competent authority shall be the legal entity who may sue and be sued.

12. Sample questions along with method of marking are given below

Question: When a tuning fork vibrates with 1.0 m or 1.05 m long wire of a konometer, 5 beats per second are produced in Each Case. What will be the frequency of the tuning fork?

CONTENTS CLASS XI SYLLABUS

UNIT 1: Physical World and Measurement
Physics: Scope and excitement; nature of physical laws; Physics, technology and society. Need for
measurement: Units of measurement; systems of units; SI units, fundamental and derived units.
Length, mass and time measurements; accuracy and precision of measuring instruments; errors in
measurement; significant figures.
Dimensions of physical quantities, dimensional analysis and its applications.
UNIT II: Kinematics
Frame of reference, Motion in a straight line; Position-time graph, speed and velocity. Uniform and
non-uniform motion, average speed and instantaneous velocity. Uniformly accelerated motion,
velocity-time and position-time graphs, for uniformly accelerated motion (graphical treatment).
Elementary concepts of differentiation and integration for describing motion. Scalar and vector
quantities: Position and displacement vectors, general vectors, general vectors and notation, equality of
vectors, multiplication of vectors by a real number; addition and subtraction of vectors. Relative velocity. Unit vectors. Resolution of a vector in a plane-rectangular components.
Unit vectors. Resolution of a vector in a plane-rectangular components. Scalar and Vector products of Vectors. Motion in a plane. Cases of uniform velocity and uniform
acceleration- projectile
motion. Uniform circular motion.
HART HI. I am of Motion
Intuitive concept of force. Inertia, Newton's first law of motion; momentum and Newton's second law
- C tion.
impulse: Newton's third law of motion. Law of conservation of linear momentum and its applications.
Equilibrium of concurrent forces. Static and Kinetic friction, laws of friction, rolling friction.
11 takin
Dynamicsofuniformcircularmotion. Centripetalforce, examples of circularmotion (vehicle on level
circular road, vehicle on banked road).
UNIT IV: Work, Energy and Power Work done by a constant force and variable force; kinetic energy, work-energy theorem, power. Notion
a the standard of a correct of a correct of a correct of the conservative torces, collect validition of the charten
of potential energy, potential energies of a spring, conservative forces; motion in a vertical circle, elastic and energy (kinetic and potential energies); non-conservative forces; motion in a vertical circle, elastic and
inelastic collisions in one and two dimensions.
of Porticles and Rigid Body
Contractings of a two-particles ystem. momentum conservation and contracting of the contr
Centre of mass of a rigid body; centre of mass of uniform rod. Moment of a force,-torque, angular momentum, conservation of angular momentum with some examples.
objects (no derivation). Statement of parallel and perpendicular axes are or the area of parallel and perpendicular axes are or the area of parallel and perpendicular axes are or the area of parallel and perpendicular axes are or the area of parallel and perpendicular axes are or the area of parallel and perpendicular axes are or the area of parallel and perpendicular axes are or the area of parallel and perpendicular axes are or the area of parallel and perpendicular axes are or the area of parallel and perpendicular axes are or the area of parallel and perpendicular axes are or the area of parallel and perpendicular axes are or the area of parallel and perpendicular axes are or the area of parallel and perpendicular axes are or the area of parallel and perpendicular axes are or the area of parallel and perpendicular axes are or the area of parallel and perpendicular axes are or the area of parallel and perpendicular axes are or the area of parallel and perpendicular axes are or the area of parallel area of parallel and perpendicular axes are or the area of parallel and perpendicular axes are or the area of parallel area.
UNIT VI: Gravitation Kepler's laws of planetary motion. The universal law of gravitation. Acceleration due to gravity and
Kepler's laws of planetary motion. The universal law of gravitations
its variation with altitude and depth. Gravitational potential energy; gravitation potential. Escape velocity, orbital velocity of a
Gravitational potential energy, gravitation potential
satellite. Geo stationary satellites. UNIT VII: Properties of Bulk Matter UNIT VII: Properties of Bulk Matter UNIT VII: Properties of Bulk Matter
UNIT VII: Properties of Bulk Matter Elastic behavior, Stress-strain relationship. Hooke's law, Young's modulus, bulk modulus, shear, modulus of
rigidity, poison's ratio; elastic energy.
Viceosity Stokes law ferminal velocity, Reynold's fidinoci, streaming the
velocity, Bernoulli's theorem and its applications.
Surface energy and surface tension, angle of contact, excess of presents, approximately
ideastodrops, bubble sand capillary rise.
ideastodrops, bubble sand capillary rise. Heat, temperature, thermal expansion; thermal expansion of solids, liquids, and gases. Heat, temperature, thermal expansion; thermal expansion of solids, liquids, and gases. Heat
Heat, temperature, thermal expansion; thermal expansion of solids, inquites, that gas- Anomalous expansion. Specific heat capacity: Cp, Cv- calorimetry; change of state – latent heat. Heat
Anomalous expansion. Specific heat capacity: Cp, Cv- calorimetry, change transfer- conduction and thermal conductivity, convection and radiation. Qualitative ideas of

Black Body Radiation, Wein's displacement law, and Green House effect. Newton's law of cooling and Stefan's law. **UNIT VIII: Thermodynamics** Thermal equilibrium and definition of temperature (zeroth law of Thermodynamics). Heat, work and internal energy. First law of thermodynamics. Is other malanda diabatic processes.Second law of the thermodynamics: Reversible and irreversible processes. Heat engines and refrigerators. UNIT IX: Behavior of Perfect Gas and Kinetic Theory Equation of state of a perfect gas, work done on compressing a gas. Kinetic theory of gases: Assumptions, concept of pressure. Kinetic energy and temperature; degrees of freedom, law of equipartition of energy (statement only) and application to specific heat capacities of gases; concept of mean free path. **UNIT X: Oscillations and Waves** Periodicmotion-period, frequency, displacement as a function of time. Periodic functions. Simple harmonic motion(SHM) and its equation; phase; oscillations of a spring-restoring force and force constant; energy in SHM -Kinetic and potential energies; simple pendulum-derivation of expression for its time period; free, forced and damped oscillations (qualitative ideas only), resonance. Wave motion. Longitudinal and transverse waves, speed of wave motion. Displacement relation for a progressive wave. Principle of superposition of waves, reflection of waves, standing waves in strings and organ pipes, fundamental mode and harmonics. Beats. Doppler effect. CONTENTS OF CLASS XII SYLLABUS **UNIT I: Electrostatics** Electric charges and their conservation. Coulomb's law-force between two point charges, forces between multiple charges; superposition principle and continuous charge distribution. Electric field, electric field due to a point charge, electric field lines; electric dipole, electric field duetoadipole; torque on adipoleina uniform electric field. Electric flux, statement of Gauss's theorem and its applications to find field due to infinitely long straight wire, uniformly charged infinite plane sheet and uniformly charged thin spherical shell (field inside and outside) Electric potential, potential difference, electric potential due to a point charge, a dipole and system of charges: equipotential surfaces, electrical potential energy of a system of two point charges and of electric diploes in an electro static field. Conductors and insulators, free charges and bound charges inside a conductor. Dielectrics and electric polarization, capacitors and capacitance, combination of capacitors in series and in parallel. capacitance of a parallel plate capacitor with and without dielectric medium between the plates, energy storedina capacitor, Van de Graff generator. **UNIT II: Current Electricity** Electric current, flow of electric charges in a metallic conductor, drift velocity and mobility, and their relation with electric current; Ohm's law, electrical resistance, V-I characteristics (liner and nonlinear), electrical energy and power, electrical resistivity and conductivity. Carbon resistors, colour code for carbon resistors; series and parallel combinations of resistors; temperature dependence of resistance. Internal resistance of a cell, potential difference and emf of a cell, combination of cells in series and in ☐ Kirchhoff's laws and simple applications. Wheatstone bridge, metre bridge. Potentiometer-principle and applications to measure potential difference, and for comparing emf of two cells; measurement of internal resistance of a cell. UNIT III: Magnetic Effects of Current and Magnetism Concept of magnetic field, Oersted's experiment. Biot-Savart law and its application to current carrying circular loop. Ampere's law and its applications to infinitely long straight wire, straight and toroidal solenoids. Force on a moving charge in uniform magnetic and electric fields. Cyclotron.

Force on a current-carrying conductor in a uniform magnetic field. Force between two parallel current-carrying conductors-definition of ampere. Torque experienced by a current loop in a magnetic field; moving coilgalvano meter-its current sensitivity and conversion to ammeter and voltmeter. Current loop as a magnetic dipole and its magnetic dipole moment. Magnetic dipole moment of a revolving electron. Magnetic field intensity due to a magnetic dipole (bar magnet) along its axis and perpendicular to its axis. Torque on a magnetic dipole (bar magnet) in a uniform magnetic field; bar magnet as an equivalent solenoid, magnetic field lines; Earth's magnetic field and magnetic elements. Para-, dia-and ferro-magnetic substances, with examples. Electromagnetic and factors affecting their strengths. Permanent magnets. UNIT IV: Electromagnetic Induction and Alternating Currents Electromagnetic induction; Faraday's law, induced emf and current; Lenz's Law, Eddy currents. Self andmutual inductance. Alternating currents, peak and rms value of alternating current/voltage; reactance and impedance; LCoscillations (qualitative treatment only), LCR series circuit, resonance; power in AC circuits, wattles current. AC generator and transformer. UNIT V: Electromagnetic Waves Need for displacement current. Electromagnetic waves and their characteristics (qualitative ideas only). Transverse nature of electromagnetic Electromagnetic spectrum (radio waves, microwaves, infrared, visible, ultraviolet, x-rays, waves. gamma rays) including elementary facts about their uses. UNIT VI: Optics Reflection of light, spherical mirrors, mirror formula. Refraction of light, total internal reflection and its applications optical fibres, refraction at spherical surfaces, lenses, thin lens formula, lens- maker's formula. Magnification, power of a lens, combination of thin lenses in contact combination of a lens and a mirror. Refraction and dispersion of light through prism. Scattering of light-blue colour of the sky and reddish appearance of the sun at sunrise and sunset. Optical instruments: Human eye, image formation and accommodation, correction of eye defects (myopia and hypermetropia) using lenses. Microscopes and astronomical telescopes (reflecting and refracting) and their magnifying powers. Wave optics: Wave front and Huygens' principle, reflection and refraction of plane wave at a plane surface using wave fronts. ☐ Proof of laws of reflection and refraction using Huygens' principle. Interference, Young's double hole experiment and expression for fringe width, coherent sources and sustained interference of light. Diffraction due to a single slit, width of central maximum. Resolving power of microscopes and astronomical telescopes. Polarisation, plane polarized light; Brewster's law, uses of plane polarized light and Polaroids. UNIT VII: Dual Nature of Matter and Radiation Photoelectric effect, Hertz and Lenard's observations; Einstein's photoelectric equation- particle nature Matter waves- wave nature of particles, de Broglie relation. Davisson-Germer experiment (experimental details should be omitted; only conclusion should be explained). UNIT VIII: Atoms and Nuclei Alpha- particle scattering experiments; Rutherford's model of atom; Bohr model, energy levels, hydrogen spectrum. Composition and size of nucleus, atomic masses, isotopes, isobars; isotones. Radioactivity- alpha, beta and gamma particles/ rays and their properties decay law. Mass-energy relation, mass defect; binding energy per nucleon and its variation with mass number, nuclear fission and fusion. **UNIT IX: Electronic Devices**

Energy bands in solids (qualitative ideas only), conductors, insulators and semiconductors: semiconductor diode- I-V characteristics in forward and reverse bias, diode as a rectifier; I-V characteristics of LED, photodiode, solar cell, and Zener diode; Zener diode as a voltage regulator. Junction transistor, transistor action, characteristics of a transistor; transistor as an amplifier (common emitter configuration) and oscillator. Logic gates (OR, AND, NOT, NAND and NOR). Transistor as aswitch.

CHEMISTRY

CONTENTS OF CLASS XI SYLLABUS

UNIT	Γ I: Some Basic Concepts of Chemistry
Γ	General Introduction: Important and scope of chemistry.
	Laws of chemical combination, Dalton's atomic theory: concept of elements, atoms and molecule
	Atomic and molecular masses. Mole concept and molar mass; percentage composition and empirical and molecular formula; chemical reactions, stoichiometry and calculations based on
	stoichiometry.

UNIT II: Structure of Atom

Atomic number, isotopes and isobars. Concept of shells and subshells, dual nature of matter and light. de Broglie's relationship, Heisenberg uncertainty principle, concept of orbital, quantum numbers, shapes of s,p and d orbitals, rules for filling electrons in orbitals- Aufbau principle, Pauli exclusion principles and Hund's rule, electronic configuration of

atoms, stability of half filled and completely filled orbitals.

UNIT III: Classification of Elements and Periodicity in Properties

Modern periodic law and long form of periodic table, periodic trends in properties of elementsatomic radii, ionic radii, ionization enthalpy, electron gain enthalpy, electrone gativity, valence.

UNIT IV: Chemical Bonding and Molecular Structure

Valence electrons, ionic bond, covalent bond, bond parameters, Lewis structure, polar character of covalent bond, valence bond theory, resonance, geometry of molecules, VSEPR theory, concept of hybridization involving s, p and d orbitals and shapes of some simple molecules, molecular orbital theory of homonuclear diatomic molecules (qualitative idea only). Hydrogenbond.

UNIT V: States of Matter: Gases and Liquids

Three states of matter, intermolecular interactions, types of bonding, melting and boiling points. role of gas laws of elucidating the concept of the molecule, Boyle's law, Charle's law, Gay Lussac's law, Avogadro's law, ideal behavior of gases, empirical derivation of gas equation. Avogadro

number, ideal gas equation. Kinetic energy and molecular speeds (elementary idea). deviation from ideal behavior, liquefaction of gases, critical temperature.

Liquid State- Vapour pressure, viscosity and surface tension (qualitative idea only, no mathematical derivations).

UNIT VI: Thermodynamics

First law of thermodynamics-internal energy and enthalpy, heat capacity and specific heat, measurement of U and H, Hess's law of constant heat summation, enthalpy of : bond dissociation, combustion, formation, atomization, sublimation, phase transition, ionization, solution and dilution.

Introduction of entropy as state function, Second law of thermodynamics, Gibbs energy change for spontaneous and non-spontaneous process, criteria for equilibrium and spontaneity.

Third law of thermodynamics- Brief introduction.

UNIT VII: Equilibrium

Equilibrium in physical and chemical processes, dynamic nature of equilibrium, law of chemical equilibrium, equilibrium constant, factors affecting equilibrium-Le Chatelier's principle; ionic equilibriumionization of acids and bases, strong and weak electrolytes, degree of ionization, ionization of polybasic acids, acid strength, concept of pH., Hydrolysis of salts (elementary idea)., butter solutions. Henderson equation, solubility product, common ion effect (with illustrative examples).

UNIT VIII: Redox Reactions

Concept of oxidation and oxidation and reduction, redox reactions oxidation number, balancing redox reactions in terms of loss and gain of electron and change in oxidation numbers.

UNIT IX: Hydrogen

Occurrence, isotopes, preparation, properties and uses of hydrogen; hydrides-lonic, covalent and interstitial; physical and chemical properties of water, heavy water; hydrogen peroxide-preparation, reactions, uses andstructure:

UNIT X: s-Block Elements (Alkali and Alkaline earth metals)

Group I and group 2 elements:

General introduction, electronic configuration, occurrence, anomalous properties of the first element of each group, diagonal relationship, trends in the variation of properties (such as ionization enthalpy, atomic and ionic radii), trends in chemical reactivity with oxygen, water, hydrogen and halogens; uses.

Preparation and Properties of Some important Compounds:

Sodium carbonate, sodium chloride, sodium hydroxide and sodium hydrogenearbonate, biological importance of sodium and potassium.

Industrial use of lime and lime stone, biological importance of MgandCa.

UNIT XI: Some p-Block Elements

General Introduction to p-Block Elements.

Group 13 elements: General introduction, electronic configuration, occurrence, variation of properties. oxidation states, trends in chemical reactivity, anomalous properties of first element of the group; Boron, some important compounds: borax, boric acids, boron hydrides. Aluminium: uses, reactions with acids and alkalies.

General 14 elements: General introduction, electronic configuration, occurrence, variation of properties, oxidation states, trends in chemical reactivity, anomalous behaviour of first element. Carbon, allotropic forms, physical and chemical properties: uses of some important compounds: oxides.

Important compounds of silicon and a few uses: silicon tetrachloride, silicones, silicones and zeolites, theiruses.

UNIT XII: Organic Chemistry- Some Basic Principles and Techniques

General introduction, methods of purification qualitative and quantitative analysis, classification and IUPAC nomenclature of organic compounds.

Electronic displacements in a covalent bond: inductive effect, electrometric effect, resonance and hyperconjugation.

Homolytic and heterolytic fission of a covalent bond: free radials, carbocations, carbanions; electrophiles and nucleophiles, types of organic reactions.

UNIT XIII: Hydrocarbons

Alkanes- Nomenclature, isomerism, conformations (ethane only), physical properties, chemical reactions including free radical mechanism of halogenation, combustion and pyrolysis.

Alkanes-Nomenclature, structure of double bond (ethene), geometrical isomerism, physical properties, methods of preparation: chemical reactions: addition of hydrogen, halogen, water, hydrogen halides (Markovnikov's additionand

peroxide effect), ozonolysis, oxidation, mechanism of electrophilic addition.

Alkynes-Nomenclature, structure of triple bond (ethyne), physical properties, methods of preparation, chemical reactions: acidic character of alkynes, addition reaction of hydrogen, halogens, hydrogen halides and water.

Aromatic hydrocarbons- Introduction, IUPAC nomenclature; Benzene; resonance, aromaticity; chemical properties: mechanism of electrophilic substitution- Nitration sulphonation, halogenation, FriedelCraft'salkylationandacylation; directive influence of functional group in

mono-substituted benzene; carcinogenicity and toxicity.

UNIT XIV: Environmental Chemistry

Environmental pollution: Air, water and soil pollution, chemical reactions in atmosphere, smogs, major atmospheric pollutants; acid rain ozone and its reactions, effects of depletion of ozone layer, greenhouse effect and global warming- pollution due to industrial wastes; green chemistry as an alternative tool for reducing pollution, strategy for control of environmental pollution.

CONTENTS OF CLASS XII SYLLABUS

UNIT I: Solid State

Classification of solids based on different binding forces; molecular, ionic covalent and metallic solids. amorphous and crystalline solids (elementary idea), unit cell in two dimensional and three dimensional lattices, calculation of density of unit cell, packing in solids, packing efficiency, voids, number of

atoms per unit cell in a cubic unit cell, point defects, electrical and magnetic properties. Band theory of metals, conductors, semiconductors and insulators. **UNIT II: Solutions**

Types of solutions, expression of concentration of solutions of solids in liquids, solubility of gases in liquids, solid solutions, colligative properties- relative lowering of vapour pressure. Raoult's law. elevation of boiling point, depression of freezing point, osmotic pressure, determination of molecular masses using colligative properties abnormal molecular mass. Van Hofffactor.

UNIT III: Electrochemistry

Redox reactions, conductance in electrolytic solutions, specific and molar conductivity variation of conductivity with

concentration, kohlrausch's Law, electrolysis and Laws of electrolysis (elementary idea), dry cellelectrolytic cells and Galvanic cells; lead accumulator, EMF of a cell, standard electrode potential. Relation between Gibbs energy change and EMF of a cell, fuel cells; corrosion.

UNIT IV: Chemical Kinetics

Rate of a reaction (average and instantaneous), factors affecting rates of reaction; concentration, temperature. catalyst; order and molecularity of a reaction; rate law and specific rate constant, integrated rate equations and half life (only for zero and first order reactions); concept of collision theory (elementary idea, no mathematical treatment). Activation energy, Arrheniousequation.

UNIT V: Surface Chemistry

Adsorption-physisorption and chemisorption; factors affecting adsorption of gases on solids, catalysis homogeneous and heterogeneous, activity and selectivity: enzyme catalysis; colloidal state: distinction suspensions; lyophillic, lyophobic multimolecular and between true solutions, colloids and macromolecular colloids; properties of colloids; Tyndall effect, Brownian movement, electrophoresis, coagulation; emulsions-types of emulsions.

UNIT VI: General Principles and Processes of Isolation of Elements

Principles and methods of extraction- concentration, oxidation, reduction electrolytic method and refining; occurrence and principleso fextraction of aluminium, copper, zincandiron.

UNIT VII: p- Block Elements

Group 15 elements: General introduction, electronic configuration, occurrence, oxidation states, trends in physical and chemical properties; preparation and properties of ammonia and nitric acid. oxides of nitrogen (structure only); Phosphorous- allotropic forms; compounds of phosphorous: preparation and properties of phosphine, halides (PCI3, PCI5) and oxoacids (elementary ideaonly).

Group 16 elements: General introduction, electronic configuration, oxidation states, occurrence, trends in physical and chemical properties; dioxygen: preparation, properties and uses; classification of oxides; ozone. Sulphur - allotropic forms; compounds of sulphur: preparation, preparation, properties and uses of sulphur dioxide; sulphuric acid: industrial process ofmanufacture, properties and uses, oxoacids ofsulphur (structures only).

Group 17 elements: General introduction, electronic configuration, oxidation states, occurrence, trends in physical and chemical properties; compounds of halogens: preparation, properties and uses of chlorine and hydrochloric acid, inter halogen compounds oxo acids of halogens (structures only).

Group 18 elements: General introduction, electronic configuration, occurrence, trends in physical and chemical properties, uses.

UNIT VIII: d and f Block Elements

General introduction, electronic configuration, characteristics of transition metals, general trends in properties of the first row transition metals- metallic character, ionization enthalpy, oxidation states. ionic radii, colour, catalytic property,

magnetic properties, interstitial compounds, alloy formation. Preparation and properties of K2Cr2O7 and KMnO4.

Lanthanoids- electronic configuration, oxidation states, chemical reactivity, and lanthanoid contraction and its consequences.

Actinoids: Electronic configuration, oxidation states and comparison with lanthanoids.

UNIT IX: Coordination Compounds

Coordination compounds: Introduction, ligands, coordination number, colour, magnetic properties and shapes, IUPAC nomenclature of mononuclear coordination compounds, isomerism (structural and stereo) bonding, Werner's theory VBT, CFT; importance of coordination compounds (in qualitative analysis, biological systems).

UNIT X: Haloalkanes and Haloarenes

reactions. Ontical rotation	on
Haloarenes: Nature of C-X bond, substitution reactions (directive influence of halogen for mono substituted compounds only)	i
· · · · · · · · · · · · · · · · · · ·	
Uses and environment effects of - dichloromethane, trichloromethane, tetrachloromethane, iodoform,	
freons, DDT.	
UNIT VI. Alask J. D.	
UNIT XI: Alcohols, Phenols and Ethers	
Alcohols: Nomenclature, methods of preparation, physical and chemical properties (of primary	
alcohols only); identification of primary, secondary and tertiary alcohols; mechanism of	
dehydration, uses with special reference to methanol andethanol.	
Phenols: Nomenclature, methods of preparation, physical and chemical properties, acidic nature of	
phenol, electrophillic substitution reactions, uses of phenols.	
Ethers: Nomenclature, methods of preparation, physical and chemical properties uses.	
UNIT XII: Aldehydes, Ketones and Carboxylic Acids	
Aldehydes and Ketones: Nomenclature, nature of carbonyl group, methods of preparation, physical	
and chemical properties; and mechanism of nucleophilic addition, reactivity of alpha hydrogen in	
aldehydes;uses.	
Carboxylic Acids: Nomenclature, acidic nature, methods of preparation, physical and chemical	
properties; uses.	
UNIT XIII: Organic Compounds Containing Nitrogen	
Amines: Nomenclature, classification, structure, methods of preparation, physical and chemical	
properties, uses, identification of primary secondary and tertiaryamines.	
Cyanides and Isocyanides, will be mentioned at relevant places.	
Diazonium salts: Preparation, chemical reactions and importance in synthetic organic chemistry.	
UNIT VIV. Riomolecules	
Carbohydrates- Classification (aldoses and ketoses), monosaccharide (glucose and fructose). D.L.	
configuration, oligosaccharides (sucrose, lactose, maltose), polysaccharides (starch, cellulose, glycogen);	
importance	
Proteins- Elementary idea of - amino acids, peptide bond, polypeptides, proteins, primary	
structure, secondary structure, tertiary structure and quaternary structure (quantative idea only).	
denaturation of proteins; enzymes.	
☐ Hormones- Elementary idea (excluding structure).	
☐ Vitamins- Classification and function.	
☐ Nucleic Acids: DNA and RNA	
UNIT XV: Polymers	
Classification- Natural and synthetic, methods of polymerization (addition and condensation).	
copolymerization. Some important polymers: natural and synthetic like polyesters, bakelite: rubber.	
Biodegradable and non-biodegradable polymers.	
UNIT XVI: Chemistry in Everyday Life	
Chemicals in medicines- analgesics, tranquilizers, antiseptics, disinfectants, antimicrobials,	
antifertility drugs, antibiotics, antacids, antihistamines.	
Chemicals in food- preservatives, artificial sweetening agents, elementary idea of antioxidants.	
☐ Cleansing agents- soaps and detergents, cleansing action.	
BIOLOGY	
BIOLOGY	
CONTENTSOFCLASSXISYLLABUS	
UNIT I: Diversity in Living World	
what is living? · Riodiversity: Need for classification: Three domains of file; Taxonomy &	
Systematics; Concept of species and taxonomical hierarchy; Binomial nomenclature; Tools for study	

of Taxonomy - Museums, Zoos, Herbaria, Botanicalgardens.

Five kingdom classification; salient features and classification of Monera; Protista and Fungi into major groups; Lichens; Viruses and Viroids.

Salient features and classification of plants into major groups-Algae, Bryophytes, Pteridophytes.

Gymnosperms and Angiosperms (three to five salient and distinguishing features and at least two examples of each category); Angiosperms- classification up to class, characteristic features and examples). Salient features and classification of animals-nonchordate up to phyla level and chordate up to classes level (three to five salient features and at least two examples).

UNIT II: Structural Organisation in Animals and Plants

Morphology and modifications; Tissues; Anatomy and functions of different parts of flowering plants: Root, stem, leaf, inflorescence-cymose and recemose, flower, fruit and seed (To be dealt along with the relevant practical of the Practical Syllabus).

Animal tissues; Morphology, anatomy and functions of different systems (digestive, circulatory,

respiratory, nervousandreproductive)ofaninsect(cockroach).(Briefaccountonly)

UNIT III: Cell Structure and Function

Cell theory and cell as the basic unit of life; Structure of prokaryotic and eukaryotic cell; Plant cell and animal cell; Cell envelope, cell membrane, cell wall; Cell organelles-structure and function: Endomembrane system-endoplasmic reticulum, Golgi bodies, lysosomes, vacuoles; mitochondria. cilia, flagella, Cytoskeleton, bodies: plastids, micro structure and function); Nucleus-nuclear membrane, chromatin, nucleolus.

Chemical constituents ofliving cells: Biomolecules-structure and function of proteins, carbodydrates.

lipids, nucleicacids;

Enzymes-types, properties, enzyme action.

BCelldivision:Cellcycle,mitosis,meiosisandtheirsignificance.

UNIT IV: Plant Physiology

Transport in plants: Movement of water, gases and nutrients; Cell to cell transport-Diffusion, facilitated diffusion, active transport; Plant - water relations - Imbibition, water potential, osmosis, plasmolysis; Long distance transport of water - Absorption, apoplast, symplast, transpiration pull, root pressure and guttation; Transpiration-Openingand closing of stomata; Uptake and translocation of mineral nutrients-Transport of food, phloem transport, Mass flow hypothesis; Diffusion of gases

Mineral nutrition: Essential minerals, macro and micronutrients and their role; Deficiency symptoms: Mineral toxicity; Elementary idea of Hydroponics as a method to study mineral nutrition; Nitrogen

metabolism-Nitrogen cycle, biological

Photosynthesis: Photosynthesis as a means of Autotrophic nutrition; Site of photosynthesis take place: pigments involved in Photosynthesis (Elementary idea); Photochemical and biosynthetic phases of photosynthesis; Cyclic and non cyclic and photophosphorylation; Chemiosmotic hypothesis; Photorespiration C3 and C4 pathways; Factorsaffecting photosynthesis.

Respiration: Exchange gases; Cellular respiration-glycolysis, fermentation (anaerobic), TCA cycle and electron transport system (aerobic); Energy relations-Number of ATP molecules generated; Amphibolic

pathways; Respiratory quotient.

Plant growth and development: Seed germination; Phases of Plant growth and plant growth rate; Conditions of growth; Differentiation, dedifferentiation and redifferentiation; Sequence of developmental process in a plant cell; Growth regulators-auxin, gibberellin, cytokinin, ethylene, ABA; Seed dormancy; Vernalisation; Photoperiodism.

UNIT IV: Human Physiology

Digestion and absorption; Alimentary canal and digestive glands; Role of digestive enzymes and gastrointestinal hormones; Peristalsis, digestion, absorption and assimilation of proteins. carbohydrates and fats; Caloric value of proteins, carbohydrates and fats; Egestion; Nutritional and digestive disorders - PEM, indigestion, constipation, vomiting, jaundice, diarrhea.

Breathing and Respiration: Respiratory organs in animals (recall only); Respiratory system in humans; Mechanism of breathing and its regulation in humans-Exchange of gases, transport of gases and regulation of respiration Respiratory volumes; Disorders related to respiration-Asthma,

Emphysema, Occupational respiratory disorders.

Body fluids and circulation: Composition of blood, blood groups, coagulation of blood; Composition of lymph and its function; Human circulatory system-Structure of human heart and blood vessels; Cardiac cycle, cardiac output, ECG, Double circulation; Regulation of cardiac activity; Disorders of circulatory system-Hypertension, Coronary artery disease, Angina pectoris, Heartfailure.

Excretory products and their elimination: Modes of excretion- Ammonotelism, ureotelism, uricotelism; Human excretory system-structure and fuction; Urine formation, Osmoregulation; Regulation of kidney function-Renin-angiotensin, Atrial Natriuretic Factor, ADH and Diabetes insipidus; Role of other organs in excretion; Disorders; Uraemia, Renal failure, Renal calculi, Nephritis; Dialysis and artificial kidney.

Locomotion and Movement: Types of movement- ciliary, fiagellar, muscular; Skeletal muscle-contractile proteins and muscle contraction; Skeletal system and its functions (To be dealt with the relevant practical of Practical syllabus); Joints; Disorders of muscular and skeletal system-Myasthenia gravis, Tetany, Muscular dystrophy, Arthritis, Osteoporosis, Gout.

Neural control and coordination: Neuron and nerves; Nervous system in humans- central nervous system, peripheral nervous system and visceral nervous system; Generation and conduction of nerve impulse; Reflex action; Sense organs; Elementary structure and function of eye andear.

Chemical coordination and regulation: Endocrine glands and hormones; Human endocrine system-Hypothalamus, Pituitary, Pineal, Thyroid, Parathyroid, Adrenal, Pancreas, Gonads; Mechanism of hormone action (Elementary Idea); Role of hormones as messengers and regulators. Hypo-and hyperactivity and related disorders (Common disorders e.g. Dwarfism, Acromegaly, Cretinism, goiter, exopthalmic goiter, diabetes, Addison's disease).

(Imp: Diseases and disorders mentioned above to be dealt in brief.)

CONTENTS OF CLASS XII SYLLABUS

UNIT I: Reproduction

Reproduction in organisms: Reproduction, a characteristic feature of all organisms for continuation of species; Modes of reproduction - Asexual and sexual; Asexual reproduction; Modes-Binary fission, sporulation, budding, gemmule, fragmentation; vegetative propagation in plants.

Sexual reproduction in flowering plants: Flower structure; Development of male and female gametophytes; Pollination- types, agencies and examples; Outbreeding devices; Pollen- Pistil interaction; Double fertilization; Post fertilization events- Development of endosperm and embryo, Development of seed and formation of fruit; Special modes-apomixis, parthenocarpy, polyembryony; Significance of seed and fruit formation.

Human Reproduction: Male and female reproductive systems; Microscopic anatomy of testis and ovary; Gametogenesis- spermatogenesis & oogenesis; Menstrual cycle; Fertilisation, embryo development upto blastocyst formation, implantation; Pregnancy and placenta formation (Elementary idea); Parturition (Elementary idea); Lactation (Elementaryidea).

Reproductive health: Need for reproductive health and prevention of sexually transmitted diseases (STD); Birth control- Need and Methods, Contraception and Medical Termination of Pregnancy (MTP); Amniocentesis; Infertility and assisted reproductive technologies - IVF, ZIFT, GIFT (Elementary idea for general awareness).

NIT II: Genetics and Evolution

Heredity and variation: Mendelian Inheritance; Deviations from Mendelian-Incomplete dominance, Co-dominance, Multiple alleles and Inheritance of blood groups. Pleiotropy; Elementary idea of polygenic inheritance; Chromosome theory of inheritance; Chromosomes and genes; Sex determination-In humans, birds, honey bee; Linkage and crossing over; Sex linked inheritance-Haemophilia, Colour blindness; Mendelian disorders in humans-Thalassemia; Chromosomal disorders in humans; Down's syndrome, Turner's and Klinefelter's syndromes.

Molecular basis of Inheritance: Search for genetic material and DNA as genetic material; Structure of DNA and RNA; DNA packaging; DNA replication; Central dogma; Transcription, genetic code, translation; Gene expression and regulation-Lac Operon; Genome and human genome project; DNA finger printing.

Evolution: Origin of life; Biological evolution and evidences for biological evolution from Paleontology, comparative anatomy, embryology and molecular evidence); Darwin's contribution, Modern Synthetic theory of Evolution; Mechanism of evolution-Variation (Mutation and Recombination) and Natural Selection with examples, types

of natural selection; Gene flow and genetic drift; Hardy-Weinberg's principle; Adaptive Radiation; Human evolution.

UNIT III: Biology and Human Welfare

Health and Disease; Pathogens; parasites causing human diseases (Malaria, Filariasis. Ascariasis. Typhoid, Pneumonia, common cold, amoebiasis, ring worm); Basic concepts of immunology-vaccines; Cancer, HIV and AIDS; Adolescence, drug and alcoholabuse.

Improvement in food production; Plant breeding, tissue culture, single cell protein,

Biofortification; Apiculture and Animalhusbandry.

Microbes in human welfare: In household food processing, industrial production, sewage treatment, energy generation and as biocontrol agents and biofertilizers.

UNIT IV: Biotechnology and Its Applications

Principles and process of Biotechnology: Genetic engineering (Recombinant DNA technology).

Application of Biotechnology in health and agriculture: Human insulin and vaccine production, gene therapy; Genetically modified organisms-Bt crops; Transgenic Animals; Biosafety issues-Biopiracy and patents.

UNIT V: Ecology and environment

Organisms and environment: Habitat and niche; Population and ecological adaptations; Population interactions-mutualism, competition, predation, parasitism; Population attributes- growth, birth rate and death rate, age distribution.

Ecosystem: Patterns, components; productivity and decomposition; Energy flow; Pyramids of number, biomass, energy; Nutrient cycling (carbon and phosphorous); Ecological succession;

Ecological Services-Carbon fixation, pollination, oxygen release.

Biodiversity and its conservation: Concept of Biodiversity; Patterns of Biodiversity; Importance of Biodiversity; Loss of Biodiversity; Biodiversity conservation; Hotspots, endangered organisms, extinction, Red Data Book, biosphere reserves, National parks and sanctuaries.

Environmental issues: Air pollution and its control; Water pollution and its control; Agrochemicals and their effects; Solid waste management; Radioactive waste management; Greenhouse effect and global warning; Ozone depletion; Deforestation; Any three case studies as success stories addressing environmental issues.
