Good

Everything is good

Nil

-

No suggestions

No improvement

Excellent

No need

Conduct youth festival

Yes

No suggestion

No

Good

More technology required

Reduce the syllabus

None

Not any

Encourage the students towards more activities regarding courses extra knowledge about future guidelines are necessary for improvement

Try to provide all the machines and equipments in lab and all the required product which are very essential for practical work

Need of internship

2

Internship of 6 months

Reduce the time of practicals and start duty of student in OPD for 3-4 days in week for self learning

It also help patient and their family

And the unwanted crowd in emergency and OPD reduced

Internship

1. Final Exams should be conducted on time so that we will cover up our within 4 years .. Otherwise if exams are delayed then rather than 4 years it will take more than 4 years to complete our study which is not good for us ...

2. The semester of 6 months should be completed in that way so that we can't suffer and can continue our study on time like other institutions....

Focus more on experimental studies rather than theoretical studies

1) There is lack of several important chemical reagents for performing experiments so please make their availability in the laboratories.

2) Proper time table coordination for vacant tutorial hours.

3) lack of orientation classes for building competitiveness among students and improving their education quality.

so, kindly focus on these matters. This will help students a lot.

Teachers should make more efforts in completing syllabus

Every teacher should actively attend the class and concentrate on the students and their syllabus also.

Held University exams on time

Growth to be done on large scale about the needs of current students and their benefits and what they are expecting from their university inspite of forcing them to work accordingly

Pharmaceutical analysis lectures needs to improve

Teacher have to complete the syllabus

On the main gate there should be facility of camera..

Test series

My Suggestion is for faculty to conduct exams on proper time so that our 4 year professional course will be only of 4 years so that we do not face any inconvenience for our further studies....as delay in exams will create problems in admission for M.Pharm for which we have will have to sacrifice our 1 year and will face difficulty.....So Proper time to time examinations should be conducted....

Provide canteen facility

In practical work

Lab have long time.so,time for 4 hours of lab is reduced.

the equipments and machineries used in the practical will be repaired and mai

need to develop the infrastructure

Everything is fine

No further improvement required

No improvement is required

Nothing required

The curriculum hours should be till 4 p.m

Too much time in classes

No time left for self study

No suggestion!

Every thing is okk

laboratory skills need to be improved

Nothing

No improvement required

Timely paper

extracurricular activities

According to your's need my respected teachers and principal sir

No improvement required

Nothing....

Conduct youth festival continuously

No need everything is excellent.

No suggestions till now

Provide canteen faculty

No need

All things is good

Maintain the schedule

The quality of chemicals in laboratory need to improve.

Some stress should be laid on sports too.

No need for further improve

Teachers should study in a proper manner specially in hindi

Baba

Nil

All is good

Teachers should be well experienced cum educated

More understanding based techniques

Want time to score in g-pat

More Strictness during LTs

Ashish

Best at its presence

Examinations can be held on time and student must be free from college so that they can prepare for masters.

Some activities will also included in it, like a educational tour in any company, vist to any hospital, duty at pharmacy department for dispensing medicine, clinical duty, one-two outdoor tour for refreshing (non-educational) and some culture activities may also held in the college.

Improve in teaching methods

A) Please make availability of necessary chemical reagents for experiment.

B) orientation classes for enhancement of enthusiastic thrill in students for education.

Exam conducted on time to time

The course is good but needed to be more about learning, instead of cramming.

More focus should be on the practical studies and students should get chance to practice in hospitals, industries etc. , exams should be on time

Everything good

Sorry I can't suggest you anything.

...

exams should be conducted on time

Teachers

115 responses

Aims and objectives of the syllabi are well defined and clear to teachers and students.

115 responses

Suggestion for further improvement

115 responses

None

No

.

Nil

Please balanced the syllabus in different semester accordingly

Some clinical practices for pharmacy students should be included

Practical standards towards industrial scope must be added.

In Pharmaceutics branch more subjects such as general pharmacy, packaging technology and experimental classes like Pharmaceutical engineering drawing, cosmetics, dosage form design etc should be incorporated

Syllabus should be well organised according to the semester and subjects organization should not be like the present one

Little bit difficult for freshers

Practicals may be increased to improve the practical knowledge of students

No improvement needed

The students should have more of practical application of theoretical knowledge

Practical knowledge must be improved.

none

Only update as and when required

Bedside clinics should be there once a week

Alok khanna, department of Pediatrics, pgims, Rohtak.

teachers with good teaching skills must come forward

The curriculum should continuously updated depending on technological advancement

More interaction based learning

Clinical oriented teaching

Teaching learning methods need to be updated and more workplace based assessment oriented.

Ok

Thank you

More practical oriented teaching more ward presence of students

All faculty need to be acclimatize to changes before incorporating them in practice

Number of theory lectures needs to be increased to some extent.

Improvement needed in the overall teacher student ratio considering tutor intensive curriculum

Need to practice it to see the improvement in training

Training is required for the faculty and administrative staff to cope up with the new curriculum

Teach skills, not just facts

Work load is more as compared to staff

Re-training

Active participation of all

Student number is too high as compared to faculty. Small group discussions are not small at all. So need to have more techniques to cater to this problem

Should increase the faculty position in the clinical departments to improve teaching along with patient care

Basic course should be increased

Previous pattern of bedside teaching and clinical demonstration was much better.

Needs lot of time for the faculty who are indulged in clinical work. Needs to work up so that patient care does not suffer

No suggestions

Communication part can be improved.

Technical aspects taught in correlation with theory can help form stronger concepts

More practical based

exhaustive

Kindly provide more IT support and infrastructure

Technology is far much advanced than that available in the Department. Cyberknife, Tomotherapy, Brainlab, Gamma Knife, Proton therapy should be included in the Department for the benefit of the patients.

Preclinical teaching can include more procedures for better understanding among students

Integrated learning should be focused for better outcomes

Good

Its Ok

This Google form is not having clear questions, the abbreviation must be given in expanded form. These question are relay to which class/ streams is a big confusion. If response has be a forego option, then i had chosen that. So please frame questions agar and send it to me for my response. My about given response to be taken as null. Waiting for corrected questions and options. Thank you for opportunities.

Need to enroll more SRs and faculty

Few amendments needed to avoid overlapping in theory & Practical, as well as different specialities. Especially in the subject Biochemistry, there is lots of overlapping of topics of pathology, microbiology, physiology & even clinical. Prof. wise distribution of syllabus is must to avoid overlapping and stress on students, as well as teachers, what to teach & what not?? Students are getting confused & not imbibing the concise basic knowledge in particular professional. Thanks & Regards.

Too much work load. Teacher student ratio imbalance. Lack of student interest in studies. Taking for granted.

No comments

Smaller groups in clinical bedside teaching

The topics need to be covered in more depth, so more theory hours are required.

Excellent step

Need based evaluation

Can improve student teacher ratio

Students need to be posted in all the specialties n super specialties during their clinical postings.

Syllabus is too lengthy

Needs increase the lectures of basics subject

Hands on training in key areas

The teaching should be more practical

More experience and practice

More interdisciplinary classes to be planned

PG should devout more time in Academics and Clinicals.

Should be more specific and practical

Make it simple

Number of lectures need to be increased as in old curriculum because students don't get sufficient knowledge in such a small number of lectures

Teaching has to be research and clinically oriented

Kindly include Radiation Oncology postings third year or later

For Microbiology per say, the current syllabus is a bit Confusing as the students need to know the organisms first and then the infective syndromes, it's easy to put ur basics into practicality that way, the current syllabus is system wise from starting and students in the beginning are still struggling which is a bacteria or a fungus or a parasite and they make blunders plus the time for subject has been reduced to fit in lot of information.

Batches should be small

Busy OPD hours need separate teacher for clinically orientation to students

Applicability of the curriculum needs more simplified approach.

More seminars and presentations should be conducted for better awareness of students.

The time frame may be made specific for specific outcome

Nothing

Practical knowledge must be combined with theory

There should be industry collaboration with each academic institution or industrial exposure should be mandatory for all students during course of study.

Nice curriculum

Time bound criteria

Industrial training and clinical training in hospitals should be incorporated in syllabus after completion of course in form of internship for proper exposure of students in industry and hospitals.

New techniques should be adopted for teaching

all nice

We can improve more

We can improve more knowledge

Need more resources especially human resources

It's helpful for teaching team

Please define the leave criteria

Please define the leave criteria in semester system

e.g. how many medical leave in each session etc.

Mi

Teacher and students ratio not maintain

Time will tell

Practical training can be included in the curriculum

Good syllabus

Required well equipped lab to make students competent and teaching faculty required training for updates knowledge and skills
