

# Invitation for Proposals

## CCTV Installation, Enhanced Monitoring, and Storage Solutions

Pt. B.D. Sharma University of Health Sciences, Rohtak (UHSR) invites proposals from reputed and experienced firms for the supply, installation, integration, and maintenance of advanced CCTV surveillance systems across its main campus and affiliated examination centers.

### **Objective**

The University aims to strengthen its surveillance infrastructure by deploying a modern CCTV system to ensure real-time monitoring of examination-related activities and enhance campus security. This initiative will support centralized monitoring, improve response capabilities, and ensure compliance with examination protocols.

### **Our Technical Requirements**

#### *Scope of Work*

Supply, installation, testing, commissioning, and maintenance of CCTV systems at various examination centers within the UHSR main campus and other locations across Haryana.

Integration of existing CCTV networks with the new system to enable centralized control and unified monitoring.

#### *Monitoring & Recording*

The central control room at UHSR should have the ability to access and record CCTV feeds from remote locations on demand.

The system must support a minimum of three months' video backup storage and retrieval .

#### *Infrastructure Setup*

Vendors shall provide and install a dedicated server and monitoring software to support seamless surveillance operations and data management.

#### *Remote Site Integration*

Surveillance systems installed at examination centers in affiliated colleges across Haryana should be remotely accessible from the University's central monitoring facility.

#### *Eligibility & Vendor Responsibilities*

Firms must have proven experience in deploying similar CCTV surveillance solutions for universities, national boards, or large institutional campuses.

Vendors are requested to submit:

A detailed technical proposal outlining system architecture, technologies to be used, and implementation methodology.

A suggested approach for integrating existing infrastructure and extending monitoring capabilities across remote locations.

AMC (Annual Maintenance Contract) rates for one year, extendable annually up to three years based on satisfactory performance.

Vendors may also assist in drafting the final tender document based on best practices and their professional expertise.

A site visit can be arranged upon request, at a mutually convenient time, to assess the current infrastructure and finalize system requirements.
